Limited Data Set

This limited data set can be used for services that occur while the client is incarcerated, if the client is in crisis, or if the client is only receiving assessment or testing services. Different data elements determine if the client meets these criteria. For clients receiving jail services the location code will need to be "9" so in this case the location code needs to be a valid code. The emergency indicator would need to be set to "Y" for clients in crisis. The CPT codes that are used for testing and assessment will be used to determine if the client is only receiving an assessment/testing service.

This file will be set up exactly like a normal MHE file with the exception that there can be unknowns on many of the fields and it will not error due to too many unknowns. Valid responses are required for the limited dataset on a select number of fields. All other fields that are required in a normal MHE file are still required to be submitted but may be an unknown value.

All files should be run through the validator before trying to upload into SAMHIS.

Diagnosis Codes:
DiagA1 – DiagA10 are for Axis I diagnosis codes. All codes will be checked to see if they comply with the accepted DSM IV format. Codes not conforming to the approve format will be rejected. There is room for up to ten diagnoses with DiagA1 filled out first followed by DiagA2 until there are no more Axis I diagnoses or DiagA10 is filled out. The date corresponding to each diagnosis is the last date the diagnosis was updated.

Enrolled In Education:
All clients should be asked "At any time IN THE LAST 3 MONTHS, has this person attended school or college? *Include only nursery or preschool, kindergarten, elementary school, home school, and schooling which lead to a high school diploma, a college degree or other formal certification or license."* This will allow the Division to more fully comply with National Outcome Measures. Code 1 for Yes, 2 for No, and 97 for Unknown. In the future this field will include program types.

Atypical Medication Used:
Code 1 for Yes if the client was prescribed one or more of these atypical medications during the quarter: Clozapine, Quetiapine, Olanzonpine, Risperdone or Ziprasidone. Code 2 for No atypical medication was prescribed during the quarter and 97 for Unknown. In the future we will be looking at including the National Drug Codes for the drugs prescribed.

Event Date Rule:

- Event Dates must fall within the current fiscal year. Event dates should include time where available.

- Event dates must fall between the client's birth date and discharge date.

Length of Stay:

Calculated from the date of admission to the most recent event of service, when a discontinuation or discharge date is received for this (unique) admission.

Age Validation:
Client's age is calculated for each event row and cannot be greater than 100.

Sub-contracting Patient Services:
When a Community Mental Health Center (CMHC) sub-contracts any patient services, it is the responsibility of the CMHC to collect necessary documentation from any subcontracted provider necessary to maintain Mental Health Event data reporting to the Division.

Record Number Rule:

Record number field is now required to be unique for a given provider and client ID on admit/event rows. Duplicate record numbers will produce an error. On discharge rows it can be left blank. If supplied on discharge records it will be validated.

Client Name Validation Rules:

MHE file will have fields for the following parts of a name:
- Last name
- First name
- Middle name

Names can be entered in either upper case, lower case, or a mix.

Spaces: Allowed in first and middle names. NOT allowed in last names.

Example: *Mc Donald*   *should be entered as*   *McDonald*

De La Cruz   *should be entered as*   *DeLaCruz*

Example: Le Ann Mary Ann Mc Cartney

Can be entered as:

First: *Le Ann*

Middle: Mary Ann

Last: *McCartney*

Hyphens: Allowed in first, middle, and last names. It is the only allowable punctuation character allowed.

Examples:

(last name) Smith-Jones should be entered as   *Smith-Jones*

(first name) Jo-Ann   *should be entered as*   *Jo-Ann*

(last name) O'Rilley   *should be entered as*   *ORilley*

(last name) St. James   *should be entered as*   *StJames*

(first name) D'Ann   *should be entered as*   *DAnn or D Ann*

Numeric characters: Not allowed in any name

First name is an initial: The initial can be entered in the first name field but no periods.

Middle name: If there is no middle name or it is not available, leave blank. Supply the full legal middle name where possible and the middle initial if that is all that is available. Periods are not allowed.

Second name: Enter the second name in the middle name field

Example: *J. Edgar Hoover*

First name: J (no period)

Middle name: Edgar

Last Name: Hoover

Enter legal names rather than nicknames

Example: "Bill" should be entered as William

"Bob" should be entered as Robert

"C.J." should be entered as Carlos as a first name and James as the middle name

Titles, Prefixes, Suffixes: not allowed

Naming rules synopsis:

Hyphen	Allowed	Allowed
Spaces	Not Allowed	Allowed
Apostrophe	Not allowed	Not allowed
Numeric Characters	Not allowed	Not allowed

CSV File Generation Guidelines

1. All files should be submitted without a header row.
2. It is recommended that fields **NOT** contain extra spaces for padding. For example, if a field allows 11 digits but the code values only use 3 digits then 3 digits is an acceptable width for the field. Adding the spaces only increases the size of the file and slows down uploading and processing of files.
3. Non-required fields must either be blank or contain a valid value.
4. Commas are not allowed within the data in any field. (Commas are column delimiters.)
5. Do not use quotes in any fields.
6. Do not insert blank lines between rows of data.

Discharge Rows

There are two types of records in an MHE file: admit/event and discharge. Discharge data is to be submitted separately from event, admission, diagnosis, and demographic information.

All records with a date in field 57 are considered discharge records.

Discharge records require that you provide data in the following fields: 2, 7, 57, 58, 59, and 68.

All other fields should be left blank. If data is supplied in any other field on a discharge records then that data is validated, but ignored.

Do not put discharge dates on rows with valid admit/event data since that data will not be loaded.

Only one discharge record will be accepted per client per admission in a given file.

Files with multiple discharge records for the same client / admission will fail to load.

Discharge dates cannot fall before any event dates for a given client and admission.

* This check is to make sure that valid admit/event data is not lost.

NOMS Values Reporting

T1 NOMS values will be taken from the first admit/event record of the reporting period (state fiscal year) and T2 NOMS values will be taken from the last date of service (most recent event record) within the reporting period.

Percent (%) Unknown Validations

The Client-side Validation Application will check for "unknown" values for fields identified in the *Mental Health Events File Format* table below with a value in the 'Unknown %' column.

Only the most recent event row for each client in the file will be used to calculate the unknown percentages. Event rows will be sorted by client and then by event date to determine the most recent event row for each client.

Discharge rows, assessment services, and services provided with the location code of "prison/correctional facility" are not included in the % of unknown calculations.

Files with unknown percentages over the acceptable limit will cause the file to error out. Processing of a file with unacceptable unknown percentage(s) will require SAMHIS Administrator assistance to override the error.

File Processing Sort Rules

MH Event Rows

Sorting as follows with subsequent sort rules applying within the 'parent' sort rule.
- System Trans Type (Delete, Add and then Change)
  - MH Provider ID (numeric ascending)
    - client ID (provider's) (alphanumeric ascending)
      - admit date (chronological)
        - event date (chronological)

MH Discharge Rows

All discharge rows are not processed until all event records in the file have either been processed successfully or were canceled. Same sort order rules apply for discharge rows (where applicable).
